A.F.-NOT ALONE(808 RECORDS 808-020)

This group I become in love in at once because this type of punkrock I really love so much. As a mix of Bad Religion and Social Distortion... much better than this it can't be.

The funny with the group is that they comes from Switzerland also and there isn't so usual with punkrockbands , anyway not in my collection. The melodies is there precisely there they should and the feeling of hearing really good punk is there all the time and here we talks quality. One of the better new bands which I have heard lately and the singers voice helps out much to get a really good soundpicture.(EIGHT)
